

Millboard® decking

We have captured the charm of real wood and at the same time eliminated the shortcomings for outdoor environments, Millboard external decking boards are produced from Prime oak samples.

Manufactured from polyurethane with up to 50% recycled filler the boards are moulded from multiple masters, rather than extruded, and then hand coloured to reproduce the detail of natural wood with minimal repetition. Millboard decking retains an exceptionally stable surface with a stunning appearance throughout its entire lifetime, and is available in two unique surface finishes.

Durathane™

With similar surface hardness to hard wood and a low slip, non-porous surface that repels algae, Durathane™ will never rot, warp or give splinters. It is suited to all domestic applications.

Lastane™

The soft elastomeric surface of Lastane™ has been fine-tuned to provide a tough, resilient, algae-repellent surface that greatly enhances slip resistance in wet conditions and is suited to both domestic and commercial decking use.

Enhanced Grain

Understandably our most popular range, the enhanced grain decking boards create a classic decked area that will compliment both traditional and contemporary settings. The accurate wood grain finish which is hand-enhanced making every board unique, is available in three attractive colours and a choice of either Durathane™ or Lastane™

Board-and-end Grain

The subtle design of board and end grain gives a distinctive image to any decking area and is unique in the market place. Taken from the finest oak samples, these boards portray the beauty of contrasting natural wood characteristics, whilst retaining the stability and safety that Millboard is renowned for with our resilient Lastane™ surface.

Half Weave

Truly bring interior design outside, half weave combines the appearance of decking boards with shorter cross pieces that add the character of parquet flooring. Blending perfectly with most settings, this exclusive design creates a relaxing atmosphere that is perfect for any prestigious outdoor area. Available in two attractive colours all boards have the Lastane™ soft, anti-slip surface.

Weathered

Adding character and style, these charming decking boards create area of timeless beauty. Taken from handpicked antique wood samples that are over 100 years old. Available in three distinctive colours, all bards have the Lastane™ soft, anti-slip surface making them as safe as they are beautiful.

Fluted

Taking inspiration from the classic style of conventional decking our fluted bards bring this design right up to date with crisp, clean lines that define and enhance the beauty of the oak grain. Available in three attractive colours and a choice of either Durathane™ or Lastane™, fluted is sure to create an eye-catching deck in all situations.

Lasta Grip 40

For use wherever extra slip resistance is required Lasta Grip 40 has two integral textured strips moulded into the soft elastomeric surface. Covering over a third of the surface area, excellent slip resistance is achieved without the risk of personal injury inherent in highly abrasive grip strips. The non-porous Lastane™ surface repels algae and needs no maintenance, simply mop with soapy water.

Step Edge

Providing the perfect finish touch for any area of decking, Millboard step edge is invaluable wherever there is a change of level, but can also be used to give an elegant finish to the perimeter of your deck. The durable Lastane™ surface together with the unique grooved profile provide extra grip while the cross grooves give excellent water drainage.

Bullnose Facia

With an integral half round nosing moulded on the top edge, our bullnose facia provides a stylish finish for all step situations. Available in four colours, it can be formed into a gentle curve for contoured steps. A plain fascia is also available.
